

September 26, 2016

Dear Mayor Smith and City Council:

While repairing Dam #1 we discovered a leak on the backside of Dam #2 which we now know must be repaired to meet Dam Safety requirements. These repairs need to be made concurrent with the work being done on Dam #1 to be cost effective. The estimate for the repairs to be made now is \$350,000.00. If we wait the costs will rise to the \$500,000.00 mark. The LRID Board simply does not have the money to do this additional work at this time as we have already committed \$500,000.00 to be paid for Dam #1 repairs.

We realize the importance of the lakes to North Little Rock in handling almost all of the runoff water for the city and for keeping areas such as Dark Hollow from flooding. We are requesting \$200,000.00 from the city for Dam #2 to be repaired while the costs is lower and Lake #1 is already drained.

Thank you in advance for your consideration in this matter,

A handwritten signature in black ink that reads "Ken Sullivan".
